

Release Notes: Version 4.0.158

Date: 5th June 2012.

Bug:	Notification Email summary section misalignment
Tracking url:	
Comment:	<p>Summary section of the email was not aligned properly in scenarios where the sections are not evenly selected between monitoring group. Ex: For application#1 user selected Receive Location and Send ports and for application#2 the user might have selected something different like orchestrations and service instances.</p> <p>The issue is now fixed in this version</p>
