

Release Notes: Version 5.0.354

Date: 20th December 2012.

Service pack release after main 5.0.284 release

Functionality:	Process Monitoring – Receive Location.
Tracking url:	Internal email
Comment:	Bug fixed: When the receive location and receive port have different names, process monitoring didn't work properly.

Bug:	Process Monitoring – Dynamic Send port.
Tracking url:	Internal email
Comment:	Bug Fixed: In the previous versions, an exception was raised when you attempt to configure process monitoring for dynamic send ports.

Bug:	Environment Sequence Number.
Tracking url:	Customer Request
Comment:	One of the customers requested a feature to sequence the configured environments. In this version you can change the sequence number in b360_admin_BizTalkEnvironments table and the UI will display it in the order.

Bug:	Event Log monitoring – Text Filter.
Tracking url:	Customer Email
Comment:	Bug Fixed: When you configure event log monitoring, text filter was not working correctly in the previous versions.
